Please disregard the first sending of this at 2:58

Mike,

Attached is the ARSG Data Conversion of C130504 that Jeff Mosal requested ESAT to complete. Also attached is the Upper Animas SAP table, which contains the sample location descriptions for all the samples taken for this event, some of which were not already described in the ARSG template that was provided to ESAT. Please note, the spreadsheet did not have the units you needed reported. After Scott Walker talked to Peter Butler it was decided that unless otherwise stated the units would be reported as ug/L, I added the units to the spreadsheet for clarification. If this is not what you are looking for please let me know and I will make any adjustments you require.

Thanks,

Janelle
